

# Mobile Computing

The PC-System is designed for moving map applications with Touratech QV4, Fugawi and Garmin software. The mobile PC handles extreme off road conditions. The system operates with Windows XP Professional and runs all common Windows application. Cars equipped with a sound system with LineIn easily use the advantage of digital sound from the MP3 player which can be installed optionally on the PC hard disc. The rugged 8.4" Car LCD monitor offers excellent readability, optionally transreflectiv.

## Specification:

- Celeron 1.50GHz (865GV Chip set) fan less, Windows XP Prof
