

## New Products

# Extreme Aire Compressors

These compressors from U.S. are designed for the heavy-duty use. With the large capacity large offroad tires are inflated in record time. The washable UNI air filter can be used endlessly. The lubrication of sealed bearings is ensured in every situation. All fittings are secured with Loctite to ensure operations at the highest vibration. Extreme Air Magnum can be mounted without additional protection in the engine compartment or under the vehicle. Versatile use includes agriculture, construction area (air brakes), Motorsport, Rally, OffRoad.

### Extreme Aire

Motor 0.56kW/12V

Current consumption 20A@12.5V @ 0 PSI

Current consumption 33A@2.4Bar (35PSI)

Current consumption 40A@10Bar (150PSI)

Pumping power: 113 l/min@0Bar (0PSI)

Pumping power: 44 l/min@6,9Bar (100PSI)

Dimensions: 35.6x15.2x28.6cm lxbxh

Weight: 7.8 kg

Duration of operation: continuous use

Installation position: no restriction

### Extreme Aire Magnum

Motor 1.1kW/12V

Current consumption 35V@12.5V @ 0 PSI

Current consumption 62A@2.4Bar (35PSI)

Current consumption 88A@10Bar (150PSI)

Pumping power: 169 l/min@0Bar (0PSI)

Pumping power: 73 l/min@6,9Bar (100PSI)

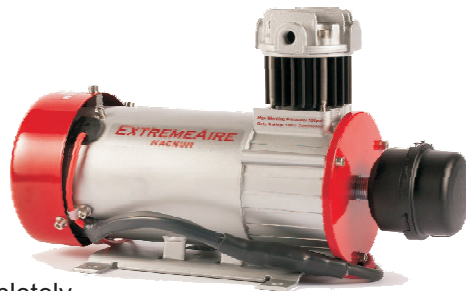

Dimensions: 40.6x15.2x24.1cm lxbxh

Weight: 9.5kg

Mounting: can be used without protection in vehicle, completely sealed compressor.

Duration of operation: continuous use

Installation position: no restriction

No.2 tire repair  
for tires and  
without hose

No.1 tire repair  
for tubeless  
mature

Portable compressor kit available  
with Extreme Aire or Extreme Aire Magnum
